Memo from

Steve McKin

SEP - 6 1990

Dear Steve

Thank you for your nice letter. My wife Marguerite and I enjoyed it; and we'd love to dine with you on the 29th Nov. We'll hold the date until we hear more specifics.

Yes, we know and enjoy Isaac Asimov + his writing's; but my interest in space travel long predates his books. And the Ken Arrows are among our close friends in Palo Alto.

I'm glad you're enjoying "science" even vicariously.

We look forward to seeing you — and the books you mentioned.

Sincerely
