I came to SU to do chemistry; but Arthur held me off (I suppose I could have been a post doc with him; and perhaps I should have. He gradually developed his own dept. to where he had least need of me. I was also dept building + much else 1960 ff (exobiol., computers & medical school. Esp after 1961 I was at most a research manager. Trend capped by the Prize. Novick said I was better suited to strategy than micro experiments. Why regret it.

CRITIQUE that role.

- Creative:

Deptl: not ambitious enough. more focussed on school than on deptl. objectives. misplaced confidence. SUMC a failure. Her Bio a success.

ICONOCLASM embraced self-skepticism, harsh evaluation of own foibles. A remarkable "respect" for authority in general
