RECEIVED

Dear Virginnia,

I watched you on the Phil Donahue show and I do have some very important questions to ask you.

I would be very pleased to have some questions answered. And I would also love to have your book. And could you please tell me where I could get one.

I lost ~~a~~ a baby on Oct 25, 1972. I wanted the baby very much. And so did my husband. I am Rh positive. When I was born I had anemia and it was 1 step from having leukemia. I only weighed 4 pounds. My baby only weighed 4 pounds. I lost my baby the doctor saying it had a blood clot in the cord. And gave birth with Placenta Previa. Could you please tell me what causes this. When I got to about 5½ months I stopped

getting bigger. I kept asking my doctor why I wasn't getting any bigger and the exact words "Is my Baby alright. I am still very sad of losing my child. His name was Andrew Ramy Howat.

I do smoke and I drink coffee every morning. And I did both on my pregnancy term. I had the bodypicher I was 8 months. He ran an X Ray on me when I was in labor. Started labor at 12 at night. Had the baby at 1:30 on the next afternoon. Please tell me or can you give me some reason for what ~~thing~~ happened to me.

My doctor is not a man in The Baby Field On General. He is a Registered M.D. And he kept telling me everything was alright. Although at times he acted as though he had a hard time finding the baby heartbeat.

Even in the ~~delivary~~ delivery room I didn't know. Yet I caught a glimpse of the doctors expression and I felt then that I could have done something.

Please write me soon. I am counting on you. Please. I donot believe in Abortion. And I ~~believe~~ believe in all you say.

Love You,
Mrs. Linda Hurst

P.S.
Let me know where to get your book.

I am 17 and my husband is 23.
