Hon. John E. Fogarty
1133 House Office Bldg.
Washington 25, D.C.

Dear Congressman Fogarty,

On Friday June 28, I visited your Providence office accompanied by Mr. Joseph MacAndrew.

We called to see you personally to seek information regarding the use of dicumarol. My husband Charles R. Capace recently suffered a heart attack and his doctor wishes him to continue daily use of this drug for an indefinite period. I realize that its use is quite common while the patients are ambulatory but apparently not as common on a daily use. I have sought medical advice from my family physician and others in the medical profession and

they are divided in their opinions as to its constant use.

Knowing of your great interest, I find it necessary to seek information on a national scale regarding the use of this drug. Neither my husband or myself have drawn any definite conclusions as to whether its use is good or bad.

Current information seems to place the medical center at Bethesda, Maryland as a leader in the field of medical research and knowing of your great interest in this hospital we turn to you for help.

Any information you can forward to us will be greatly appreciated and be treated confidentially.

Sincerely,

Velma Capace

Mrs. Charles R. Capace
